Christina **Isakoglou**

Software Engineer | Platform & Backend Systems | AEM & Agent-Based Architectures

+41 76 772 19 44 | christinaisakoglou@gmail.com | cisakoglou.github.io | cisakoglou | christinaisakoglou

Work Experience

Adobe
Basel, Switzerland

Software Engineer — *Feb. 2026 - Present*

- Building and extending Adobe Experience Manager (AEM) Headless, improving content authoring workflows and developer experience for large-scale content delivery systems.
- Building MCP-based integrations and agent-driven workflows to enable structured content retrieval and interaction with AEM systems.
  Key tools: Java, TypeScript, Python, Kubernetes, Docker, Adobe Experience Manager (AEM), REST APIs, MCP, Agent-based systems

Everbridge
Deventer, Netherlands

Software Engineer — *Nov. 2022 - Oct. 2025*

- Re-architected *Element Manager*, a real-time platform for ingesting and routing telemetry data from distributed systems, improving monitoring, anomaly detection, and infrastructure forensics while reducing troubleshooting time and increasing system reliability.
- Implemented cloud-native deployments with Docker and Kubernetes, cutting deployment effort by two-thirds and minimizing user intervention, while enhancing component flexibility and customization for end users.
- Engineered a streaming ELT stack (Kafka, Telegraf, Benthos, Kapacitor, Elasticsearch) to deliver reliable data ingestion, transformation, and real-time insights for distributed deployments.
  Key Tools: Java, Python, Bash, Kubernetes, Helm, Docker, ELT pipelines, Kafka, Elasticsearch

Donders Institute for Brain, Cognition and Behavior
Nijmegen, Netherlands

Researcher PHD Candidate — *Mar. 2018 - Present*

- Built ML pipelines in Python to analyze sensitive neuroimaging datasets at scale, applying methods like dimensionality reduction and anomaly detection on high-dimensional signals.
- Developed reproducible data workflows and dashboards to support long-term, privacy-aware behavioral data research — aligned with security and ethical handling of personal data.
- Contributed to cross-functional projects combining data science, signal processing, and infrastructure integration.
  Key Tools: Python, Machine Learning, Scikit-learn, Plotly, SciPy, Heroku

European Commission @ Informatics Lab (AUTh)
Thessaloniki, Greece

Research Full-Stack Web Developer — *July 2014 - Mar. 2016*

- Built and maintained the Central Testing Platform for the e-CODEX project — a legal tech platform supporting European countries in secure, standards-compliant cross-border judicial communication.
- Developed validation frameworks to test system interoperability and protocol compliance, contributing to trusted communications for sensitive legal data exchange.
- Engaged with governmental stakeholders to implement test scenarios aligned with privacy and cybersecurity standards.
  Key Tools: PHP, MySQL, Full-Stack Web Dev, Linux, Testing Automation, REST APIs

Information Technology Center (AUTh)
Thessaloniki, Greece

Computer Programming Intern — *Nov. 2011 - Feb. 2012*

- Supported internal university IT operations with scripting for system automation and database maintenance.
- Developed internal tools in PHP to streamline administrative and academic workflows.

Education

Donders Institute
Nijmegen, Netherlands

PhD in Machine Learning for Psychiatric Neuroimaging — *2018 - 2023*

- Topic: Method development for the longitudinal study of brain development and individual variation.
- Supervisors: Andre Marquand, Thomas Wolfers & Christian Beckmann

Radboud University Nijmegen
Nijmegen, Netherlands

MSc in Cognitive Neuroscience (Research) — *2015 - 2017*

- Specialization in Brain Networks & Neuronal Communication
- Thesis on pattern recognition in neuroimaging, GPA: 3.4/4.0
- Supervisors: Thomas Wolfers & Andre Marquand

Aristotle University of Thessaloniki (AUTh)
Thessaloniki, Greece

Bachelor's Degree in Informatics — *2010 - 2015*

- Specialization in Digital Media
- Thesis on neuroinformatics, emotion-recognition & ECoG Signal , GPA: 8.52/10.00 (Excellent)
- Supervisor: Nikos Laskaris

Skills

Data Engineering & ML	ELT pipelines (Kafka, Telegraf, Benthos, Kapacitor, Elasticsearch), Scikit-learn, Pandas, SciPy
Observability & Tools	Opentelemetry, Grafana, Kibana, Git, Knowi
Cloud & Infrastructure	AWS, Docker, Kubernetes, Helm, Linux, Windows, Android
Programming	Python, Java, C/C++, PHP, JavaScript, R, Matlab, HTML/CSS
